

## BASIC GUIDELINES

### SIMONS PLUTONE 2 IRON CONTINUOUS OPERATION STEAM BOILER UNIT

<b>BOILER CAPACITY</b>	5 litres clean tap water (warm to hot should be used). Check level using view panel at front of unit. <b>Make sure there is always water in the tank.</b>
<b>WARM UP TIME</b>	Approx. 10 minutes – 15 minutes
<b>RUN TIME</b>	5 to 6 hours
<b>RECOMMENDED</b>	IT IS RECOMMENDED THE UNIT IS CHECKED AND REFILLED AS REQUIRED
<b>INCLUDED ACCESSORIES:</b>	Mobile stand, tank, mat & cable springs.

1. **To refill.** Turn boiler switch off and turn off at power socket.. Drain all the steam via the iron microswitch (steam button). Replace filler cap, plug in power supply and switch on.  
**Fill 10 litre plastic bottle and restart.**
2. **Normal usage.** For dry ironing it is possible to adjust the thermostat on different positions according to the type of fabric (check garment label). For steam ironing you should adjust thermostat on "cotton-linel" position. A Teflon shoe is available as an accessory for delicate synthetics and woollens.
3. **Maintenance.** The unit needs weekly cleaning to remove dirty water deposits. When hot, unplug from power point, fill boiler with fresh water, drain into the plastic container. Repeat with warm water two to three times until most deposits have been removed.
4. **Power Requirement.** 240v plus Neutral.
